Dissolved Hydrocarbon Gases:

The methane result for samples 1203020-03 and 1203020-04 was flagged as estimated since the concentration of this analyte in the sample was less than five times the concentration found in the associated trip and field blanks.

A chromatographic peak was found within the presumed retention time window for propane for sample 1203018-04. Propane is likely present in this sample.

Samples in work order 1203024 (received on 3/9/12) were at received at 8 degrees C. This is above the recommended temperature range of 0 to 6 degrees C. No significant impact on the sample results is expected.
